About Kerone

KERONE now renowned name in serving specialized need of customers with best quality and economical process Heating /cooling and drying products, manufactured in high quality environment by well trained and qualified workforce(special purpose machineries) .

KERONE is pioneer in application and implementation engineering with its vast experience and team of professionals. KERONE is devoted to serve the industry to optimize their operations both economically and environmentally with its specialized heating and drying solutions.

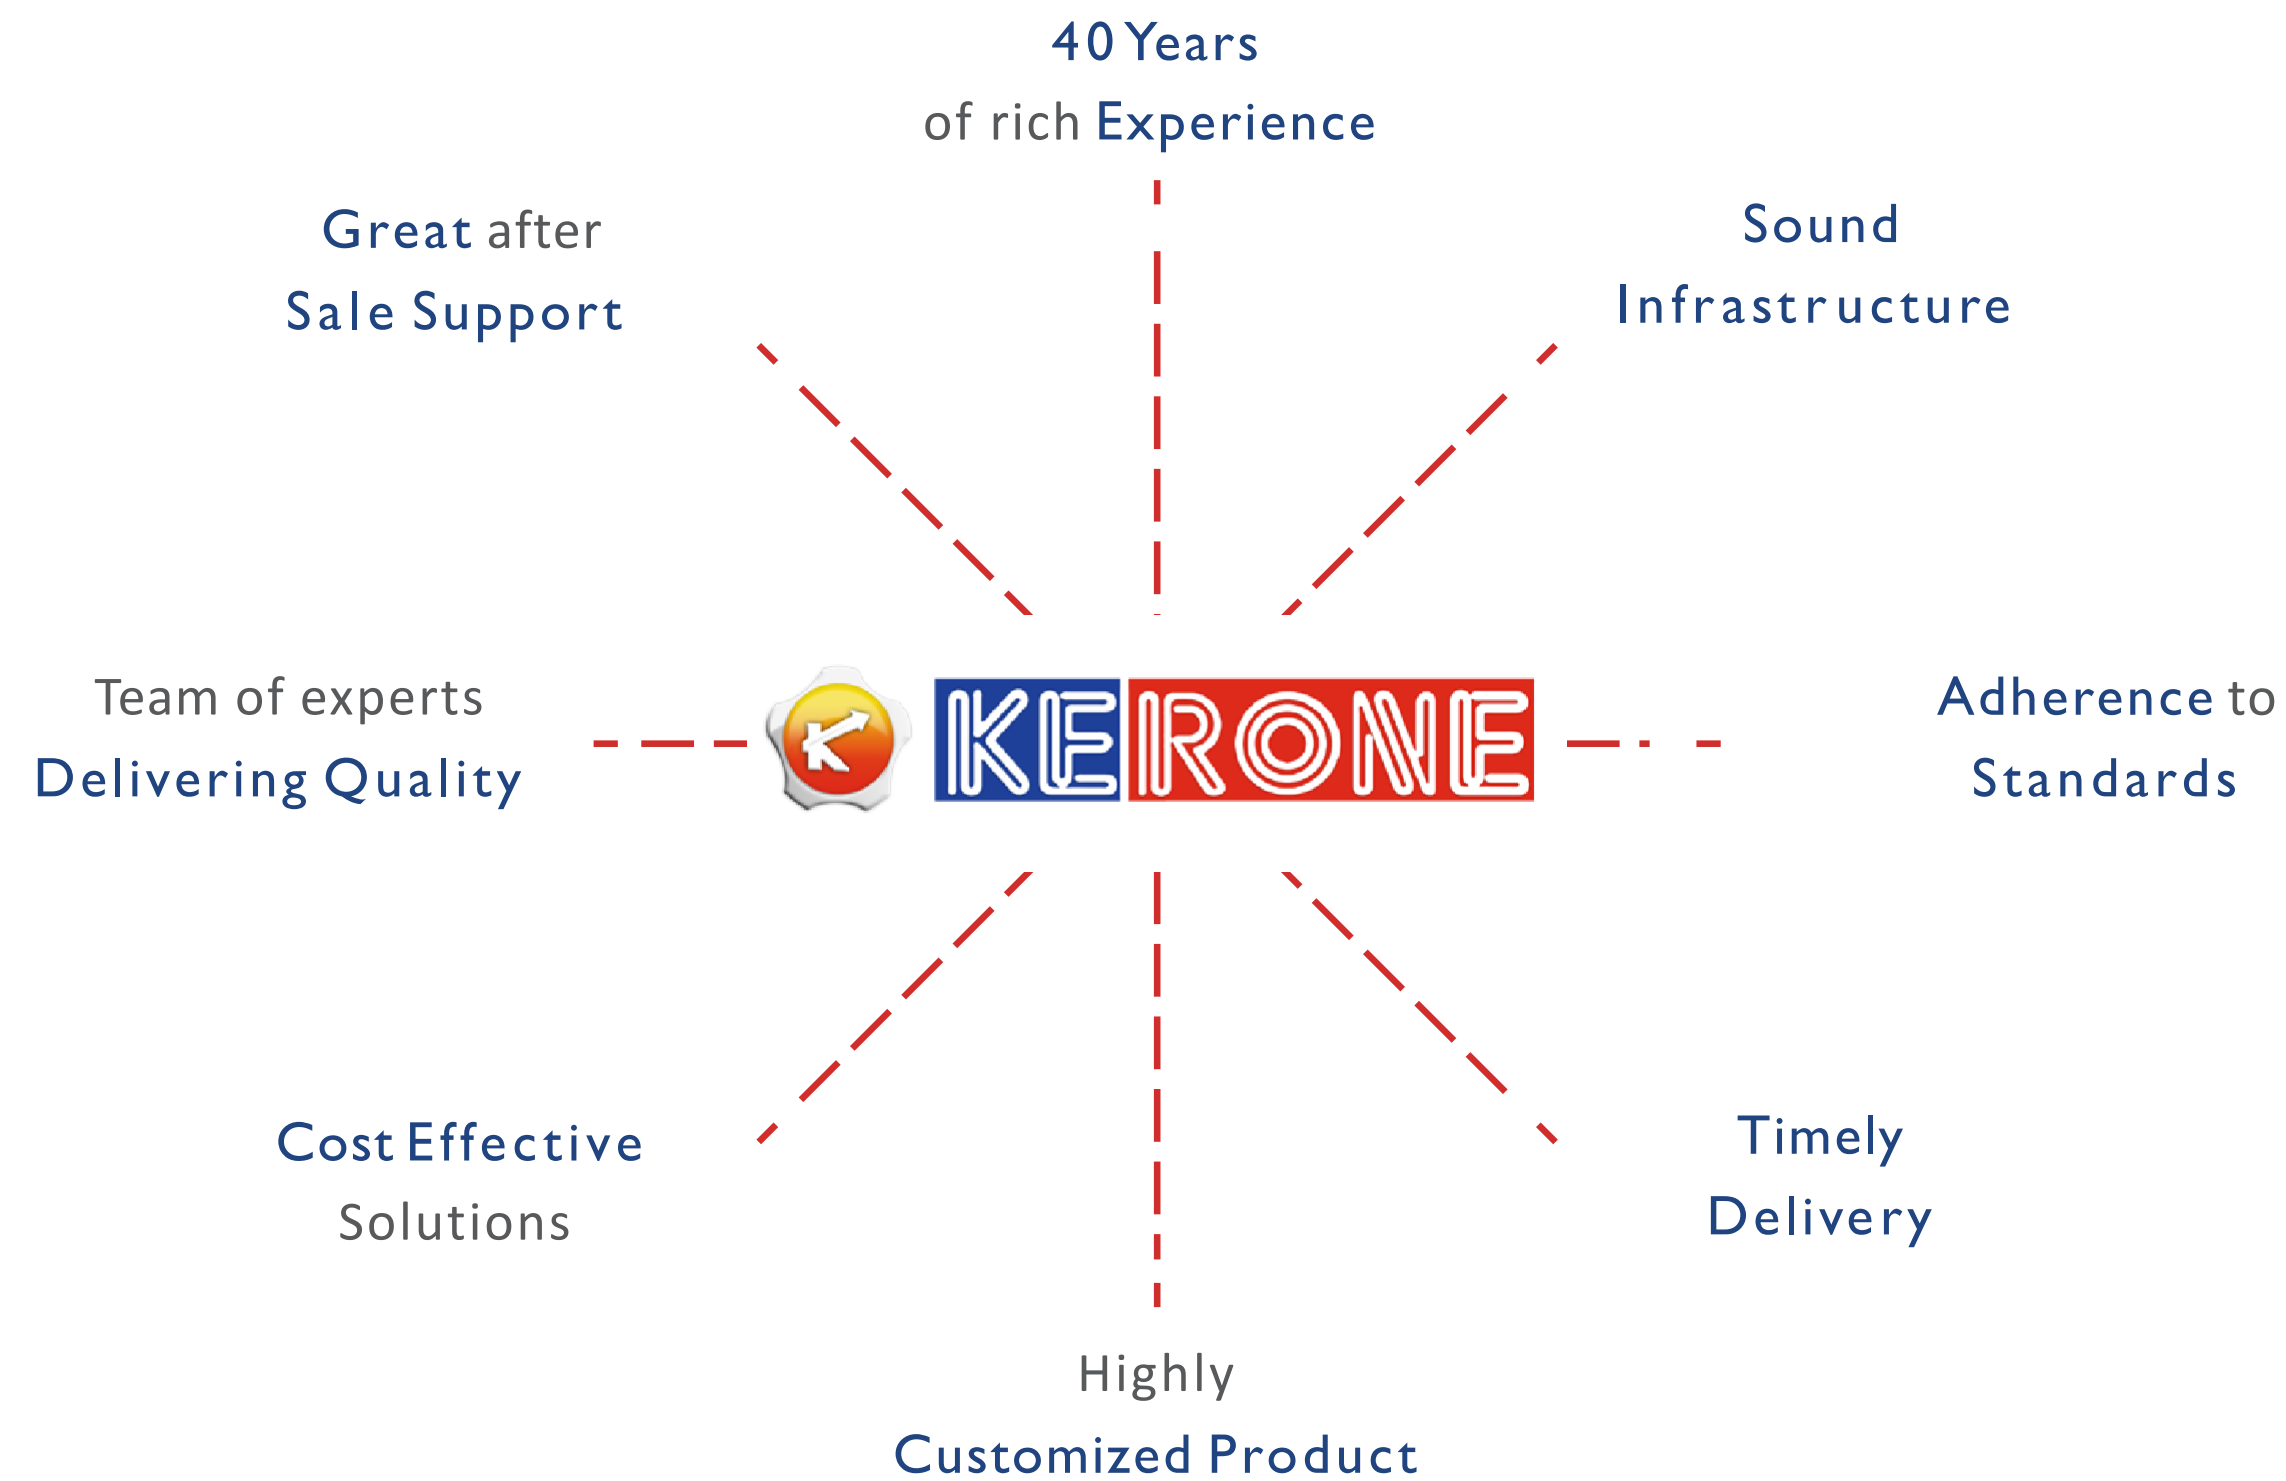

”Enhance the value of customer operation through our customer need centric engineering solution”

Mission

- To enhance the value of customer operation through our customer need centric engineering solution.
- We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

Vision

- Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.
- To attain global recognition as best of quality and environment friendly engineering solution company.

Introduction to

Continuous UV Sterilization Systems

UV Sterilization System uses short-wavelength ultraviolet (ultraviolet C or UVC) light to kill or inactivate microorganisms by destroying nucleic acids and disrupting their DNA, leaving them unable to perform vital cellular functions. UVC light in the range of 200-400 nm specifically, is proven to quickly eliminate harmful germs including many bacteria and viruses. It is used in many industries for sterilization applications like Food and Beverages, Bio-Pharmaceutical, Waste water disinfection etc.

Features

- Speedy Sterilization: It is non-contact sterilization therefore requires short process time.
- Flexible Operation: Can be used to treat both solid and liquid products.
- High Efficiency: UV Sterilization is effective to remove most microorganisms.
- Easy Control: Start and stop process are functioned automatically for easy and safe operating.
- High Quality: Uniform sterilization to guarantee high quality products.
- Environmentally Friendly: No Toxic by-products are formed during the UV disinfection process
- Small Space Required: Continuous and high efficiency working to minimize operating space.
- Good Working Environment: Free of hot and noise problem.
