FLASH DRYER

Environment Friendly Engineering Solution Company
About Kerone

KERONE now renowned name in serving specialized need of customers with best quality and economical process Heating /cooling and drying products, manufactured in high quality environment by well trained and qualified workforce(special purpose machineries).

KERONE is pioneer in application and implementation engineering with its vast experience and team of professionals. KERONE is devoted to serve the industry to optimize their operations both economically and environmentally with its specialized heating and drying solutions.

"Enhance the value of customer operation through our customer need centric engineering solution"

Mission

• To enhance the value of customer operation through our customer need centric engineering solution.

• We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

Vision

• Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.

• To attain global recognition as best of quality and environment friendly engineering solution company.
Highly Customized Product

40 Years of rich Experience

Sound Infrastructure

Adherence to Standards

Timely Delivery

Great after Sale Support

Team of experts Delivering Quality

Cost Effective Solutions

Highly Customized Product
Introduction to Flash Dryer

Drying is an inseparable part of processing in chemical and pharmaceutical, food and dairy, polymer and ceramic, biotechnology, pulp and paper, agricultural, wood industries and many others. However, the process of drying is demanding enormous energy and in many cases leading to emission of carbon dioxide and hazardous gases.

Pneumatic/Flash dryers are direct drying units and are known as convective dryers. In pneumatic flash drying system particulate solids to be dried travels through the drying duct along with hot air and it get dried during transport in a hot gas stream. The pneumatic flash dryer system consist of below components:

- Gas Heater
- Wet Material Feeder
- Drying Duct
- Separator
- Exhaust Fan
- Dried Product Collector

www.kerone.com/pneumatic-flash-dryer.php
Features

- Drying is accomplished at low outlet drying temperatures, hence provides high energy utilization.
- High drying effectiveness and low energy expenses.
- Continuous processing can be achieved in small drying time.
- Pneumatic Flash dryers can process at very high capacity in small amount of scape.
- Kerone’s flash dryer provides High thermal flash drying efficiency.
- Flash dryer provide high evaporation capacity.
- Cooling fans with high volume, pressure.
- Auto, manual switches.
- Digital control panel.
- Ease of installation.
- Compact design.

Application

Pneumatic Flash dryer are suitable for the following industries:
Chemical | Food | Pharmaceutical | Mining | Ceramic | Agriculture and Animal Feeds | Paper & Wood and etc.

Commonly used for

- Drying of Vegetable Protein
- Drying of Spent Tea
- Drying of Wheat Starch
- Drying of Soybean Protein
- Drying of Meat Residue
- Drying of Flour
- Drying of Cement
- Drying of Aniline Dyes
- Drying of Blowing Agents
- Drying of Coal Dust
- Drying of Bread Crumbs
- Drying of Cornstarch
- Drying of Corn Gluten
- Drying of Casein
- Drying of Gravy Powder
- Drying of Soup Powder
- Drying of Chlorinated
- Drying of Rubber
- Drying of Copper Oxide
- Drying of Gypsum
