About Kerone

KERONE now renowned name in serving specialized need of customers with best quality and economical process Heating /cooling and drying products, manufactured in high quality environment by well trained and qualified workforce(special purpose machineries) .

KERONE is pioneer in application and implementation engineering with its vast experience and team of professionals. KERONE is devoted to serve the industry to optimize their operations both economically and environmentally with its specialized heating and drying solutions.

“Enhance the value of customer operation through our customer need centric engineering solution”

Mission

- To enhance the value of customer operation through our customer need centric engineering solution.
- We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

Vision

- Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.
- To attain global recognition as best of quality and environment friendly engineering solution company.

Introduction to Heaters Gas IR

IR radiant heating, indirect or direct fired radiant gas heating, is the most efficient heating that can be easily installed in industrial, commercial, agricultural and garages. In most cases infrared heating can save business or building owners over 30-50% when compared to conventional forced air heating.

The tube heaters and radiant ceramic plaque heaters are a popular heating solution for buildings such as a factory, warehouse, garage, fire station, manufacturing plant, auto dealership, machine shop, truck service area, farm building, greenhouse, loading dock, sports arena and aircraft hangars. Radiant tube heaters and radiant cone brooder heaters are popular for agricultural buildings such as poultry houses.

The blown warm air heater for chickens, turkeys & other poultry provides a 'whole house' heating solution which can also be installed in conjunction with energy efficient radiant brooder heaters.
