About Kerone

KERONE now renowned name in serving specialized need of customers with best quality and economical process Heating /cooling and drying products, manufactured in high quality environment by well trained and qualified workforce(special purpose machineries) .

KERONE is pioneer in application and implementation engineering with its vast experience and team of professionals. KERONE is devoted to serve the industry to optimize their operations both economically and environmentally with its specialized heating and drying solutions.

“Enhance the value of customer operation through our customer need centric engineering solution”

Mission

- To enhance the value of customer operation through our customer need centric engineering solution.
- We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

Vision

- Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.
- To attain global recognition as best of quality and environment friendly engineering solution company.

Introduction to Medium Wave Infrared Heaters

Infrared Heaters quickly transfer the heat and heats the targeted material. Infrared heaters are easily adaptable and suitable for the heating and drying applications, Medium wave Infrared is easily absorbable by plastic, water and other solvents.

The Medium wave infrared heaters manufactured by KERONE consist of spiral resistance coil placed pure vitreous silica fused quartz tube.

The ceramic insulating caps at the end of the quartz tube are specially designed and fastened to the tube with high temperature cement to allow the tube to breath.

They are made up of high quality material offering superior performance and long life. Because of their long life, these heaters are best suited for continuous process.

Features

- It is available in diameters of 8, 10, 12, 15 and 19 mm.
- The length varies from 300 to 1500 mm.
- They can be used in horizontal position.
- Specially designed heating coils ensure longer life.
- Maintenance required is least.

Application

- Shrink Packaging Machines.
- Drying Textiles.
- Lamination Industries.
- Rubber Curing.
- Drying of paints
- Processing Plastic foils and sheet
