About Kerone

KERONE now renowned name in serving specialized need of customers with best quality and economical process Heating /cooling and drying products, manufactured in high quality environment by well trained and qualified workforce(special purpose machineries) .

KERONE is pioneer in application and implementation engineering with its vast experience and team of professionals. KERONE is devoted to serve the industry to optimize their operations both economically and environmentally with its specialized heating and drying solutions.

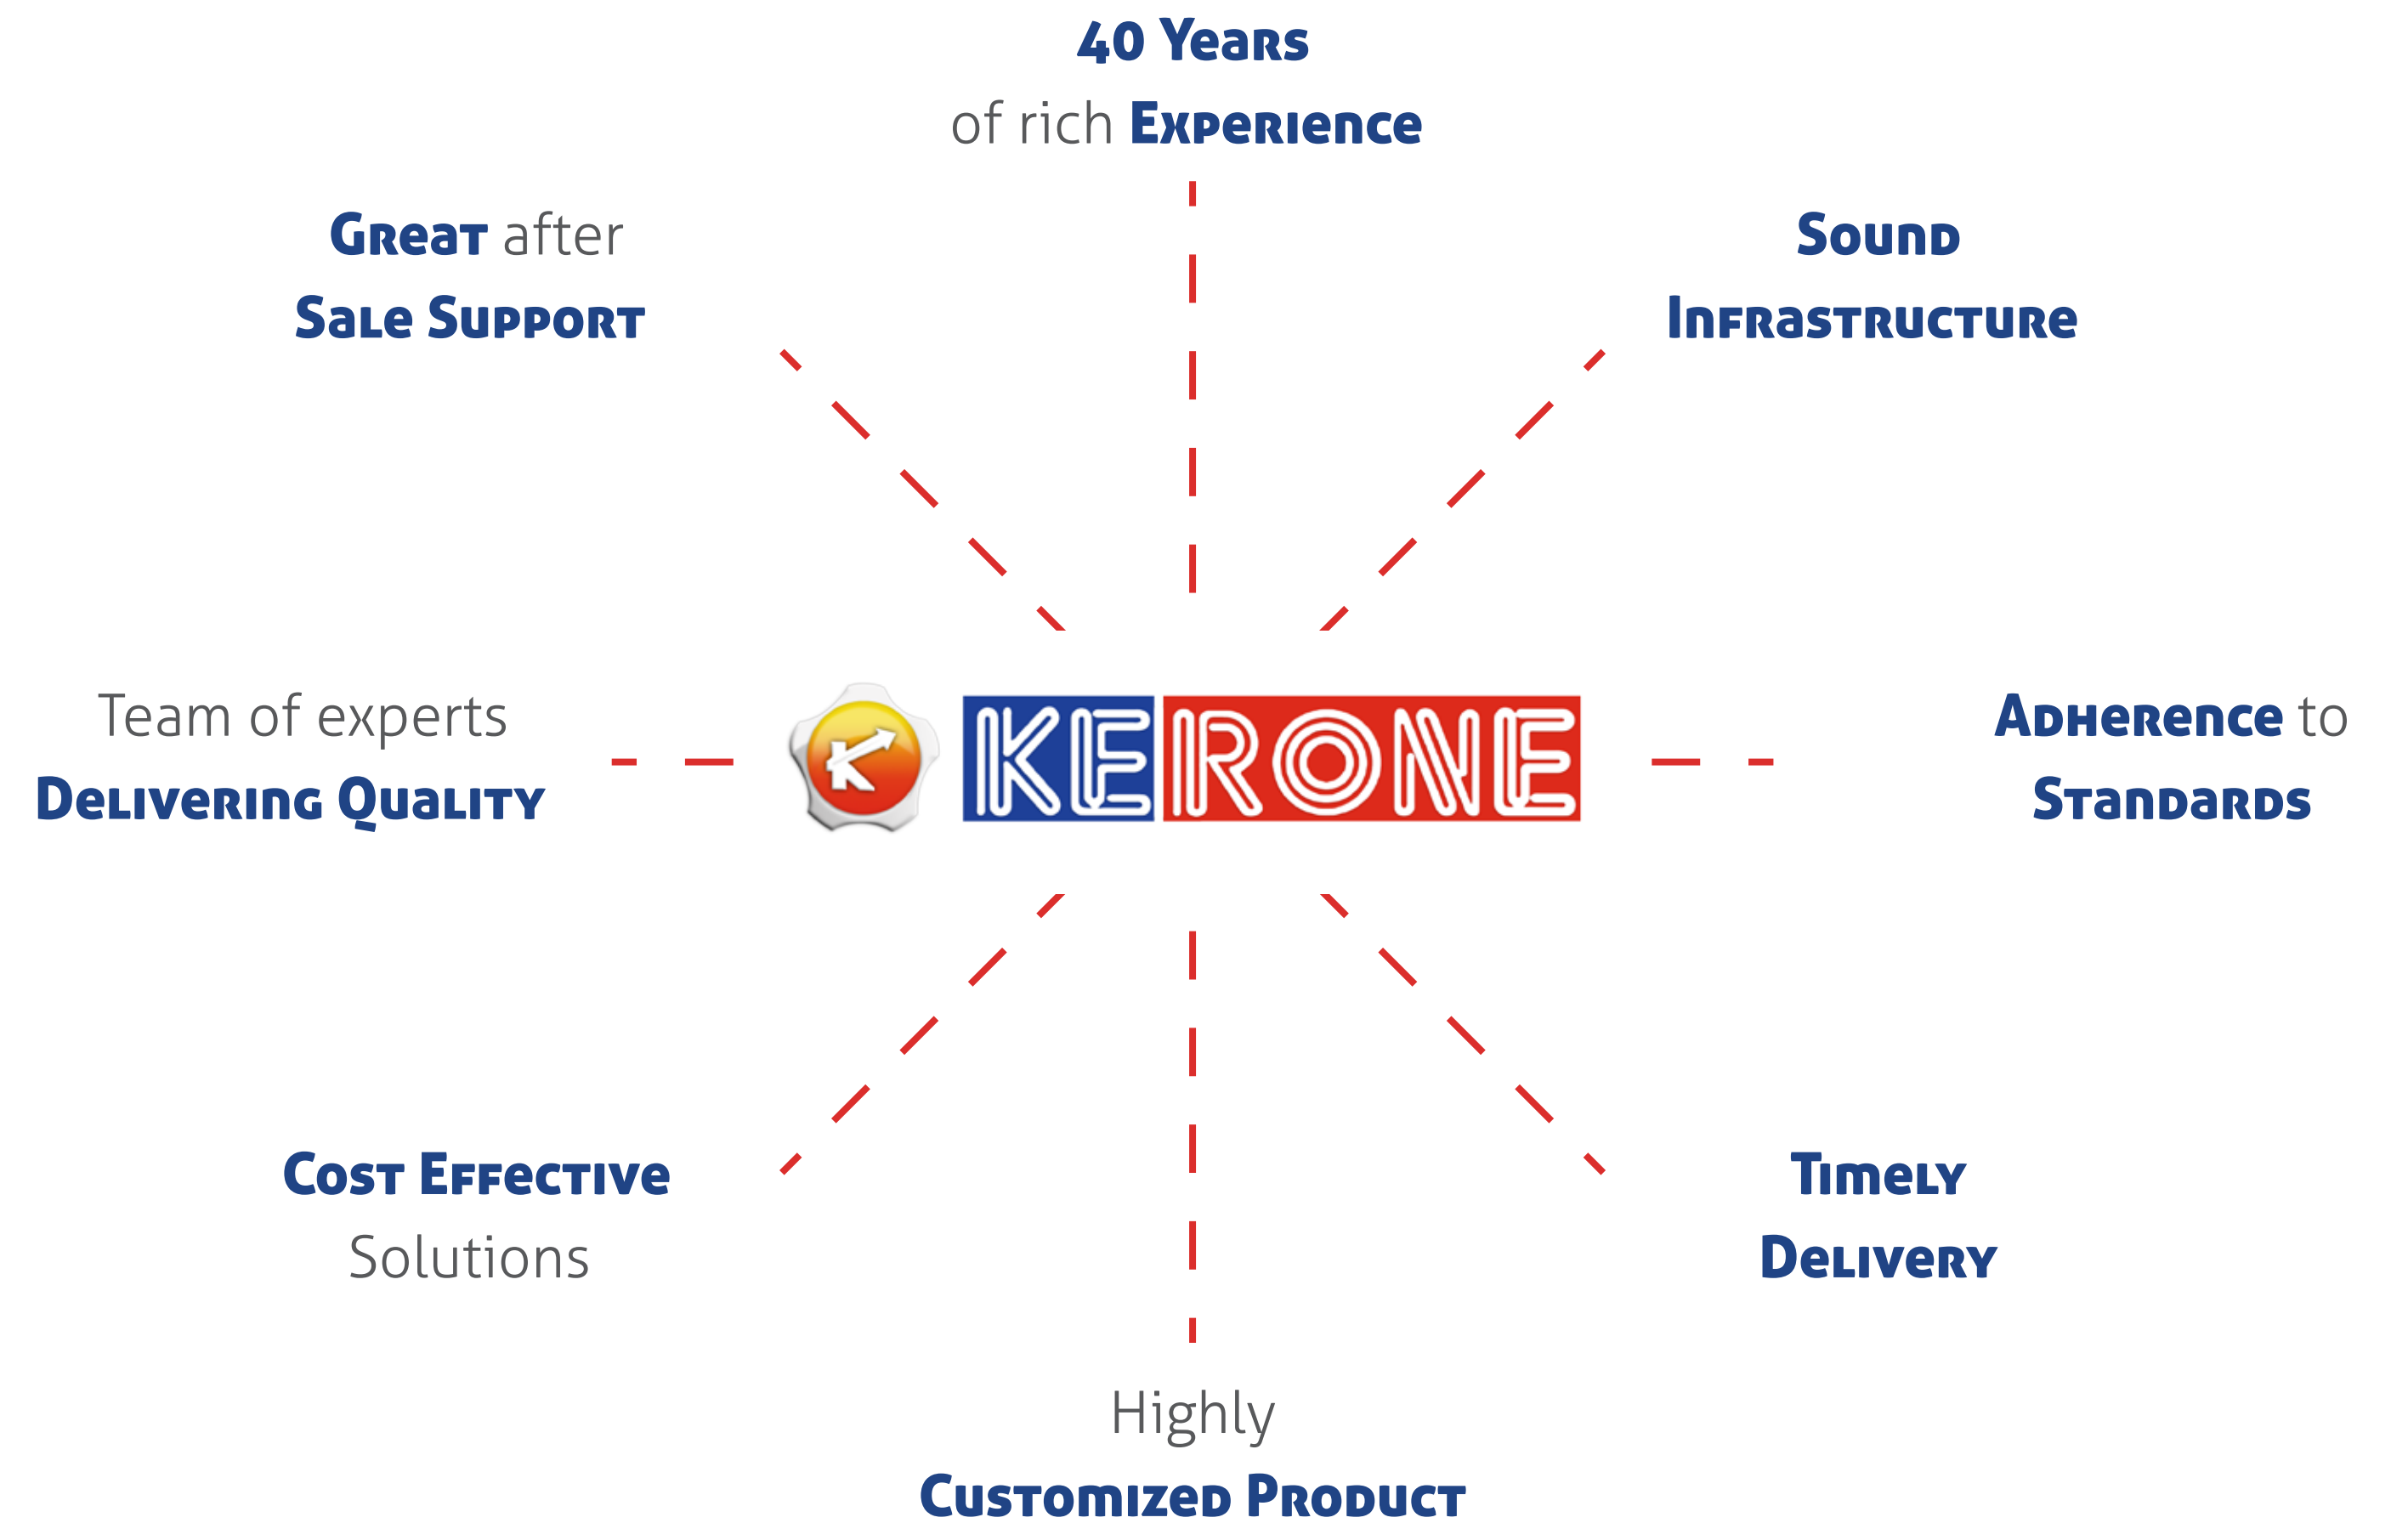

“Enhance the value of customer operation through our customer need centric engineering solution”

Mission

- To enhance the value of customer operation through our customer need centric engineering solution.
- We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

Vision

- Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.
- To attain global recognition as best of quality and environment friendly engineering solution company.

Introduction to Curtain Coating Machine

Curtain coating process creates an uninterrupted curtain of fluid that falls onto a substrate. The object to be coated, such as a door, is passed along the conveyor at a controlled speed and so receives even coating on its upper face. The curtain is created by using a slit at the base of the holding tank, allowing the liquid to fall upon the substrate.

Advantages

- **Speed:** This system can coat from 3,000 to 4,000 pieces per hour.
- Minimum personnel required.
- **Virtually no waste:** Since the small amount of unused coating is cycled back into the system, this method wastes less coating than any other.
- **Aesthetics:** The only non-spray process that imparts a smooth, glossy finish, with no track marks.
- **Flexibility:** Disks can be as thin or as thick as specifications require.

Uses

- Promotional, opening price-point and moderate market levels.
- Cookware: Interiors and exteriors.
- Bakeware
- Small electrics.
